Native Tree and shrub planting ideas.

Always plant native trees and shrubs for your area. Evergreen is best. These will be the most hardy and provide the most photosynthesis year around.

Residential:

Plant native shrubs as many as you can. Plant 1 or 2 trees if you have room.

Business:

Plant as above but put dirt on flat roofs (if structure supports it) and maximize shrubs.

Government:

Provide space where public can come and plant trees and shrubs.

Plant shrubs in all freeway medians.

Get schools involved and planting massive number of trees and shrubs.

Parks can add trees and shrubs.
