

GES Fall 2020

Discovery: Reduction in
photosynthesis correlation to
atmospheric CO₂ increase.

AGU Fall 2020

- ❖ Agenda
 - ❖ I-Atmospheric CO₂ is not an emissions issue
 - ❖ II-Sea Level Rise is not accelerating
 - ❖ Summary

I-Atmospheric CO₂ is not an emissions issue

- ❖ Follow the data
- ❖ Global carbon atlas.
- ❖ Why its not our emissions
- ❖ Where we are
- ❖ Mauna Loa CO₂ Growth Rate
- ❖ Where we are going
- ❖ Future
- ❖ Photosynthesis issues
- ❖ Correct solution for Atmospheric CO₂ with results!
- ❖ Global Warming Potential

Follow the data Not an Agenda

- ❖ Use all the data- don't cherry pick
- ❖ See what the data says. Perform statistical analysis.
- ❖ All models much be verified with actual data.
- ❖ This presentation is the result of following the data.
- ❖ Nature Climate Change is a farce Journal.

Global Carbon Atlas

- ❖ USA 2006: 6131 MtCO₂ and in 2018: 5270 MtCO₂ --a 16% decrease of CO₂.
- ❖ Europe 1990: 4479 MtCO₂ and in 2018: 3544 MtCO₂ --a 21% decrease of CO₂.

Where we are

❖ After spending \$2.8 trillion we have:

2008 $r_{xy}=0.87$

2020 $r_{xy}=0.63$

❖ We have had mostly lower fossil fuel emissions since 2014. Massive deforestation continues!

Mauna Loa CO₂ Growth Rate

- ❖ Annual mean global CO₂ growth rate is increasing.

Where we are going

❖ Facts

- ❖ Minimum residence time 150 years. Was 5 years
- ❖ Most work is on carbon emission reduction
 - ❖ Reforestation efforts in China and North America ongoing.
- ❖ Atmospheric CO₂ is “Extra” that is not consumed in photosynthesis

❖ Assumptions

- ❖ Keep current carbon emissions level at 35 billion metric tons annually.
 - ❖ Decreases of carbon emissions will be offset by increases in population
- ❖ Atmospheric CO₂ stays the same slope.
- ❖ At 100 years no more oil so carbon dioxide emissions drop by 30%

Residence Time of Atmospheric CO₂

Residence Time (Years)	Author	Year
>700	Allen	2009
610	Zickfeld	2013
500	Matthews	2008
300	Plattner	2008
270	Cao	2010
230	Zickfeld	2012
220	Solomon	2012
220	Knutti	2012
210	Gillett	2011
180	Frölicher	2010
150	Hare	2006

- ❖ Unrealized Global Temperature Increase: Implications of Current Uncertainties, Schwartz, S. E. J. Geophys. Res. , 2018, doi: 10.1002/2017JD028121.

Residence Time

- ❖ Another way to look at residence time is a signature from past events, which lowered CO₂ emissions.
 - ❖ Oil embargo in the 1970's
 - ❖ Multiple recessions
 - ❖ Worldwide recession in 2009.
 - ❖ COVID-19 pandemic.
 - ❖ **You can clearly see no signature from these event**
-
- ❖ Netflix watch “Kiss the ground” movie explains even if we stopped all CO₂ emissions atmospheric CO₂ will not lower.

Future with residence time 100 years

- ❖ CO₂ emissions correlation shrinks with passing of time.
- ❖ Goes to zero at 580 ppm, Year 2060

Pearson's regression

Why its not our emissions

- ❖ 90% of People live in Northern Hemisphere
- ❖ 90% of our emissions:

World Population by latitude

Atmospheric CO₂ Tank Model

What Photosynthesis could be 55 ppm?

Atmospheric CO₂ by latitude

- ❖ CO₂ mixed by atmospheric winds.

❖ Courtesy Pieter Tans Mauna Loa

Mauna Loa harmonic trend

Strong (yellow line) at south pole

Photosynthesis issues

- ❖ City sprawl is 1 billion tons lost CO₂ consumption annually
- ❖ IPPC forestry estimates 2-3 billion tons lost CO₂ consumption annually from bio-mass burning.
- ❖ Deforestation of 30 million acres annually in Amazon Rain-forest is 90 million tons lost CO₂ consumption. Total of 60 billion tons lost since 1950.
- ❖ More than 300 billion tons lost CO₂ consumption annually from Amazon Rain-forest switching. 19x our emissions output.

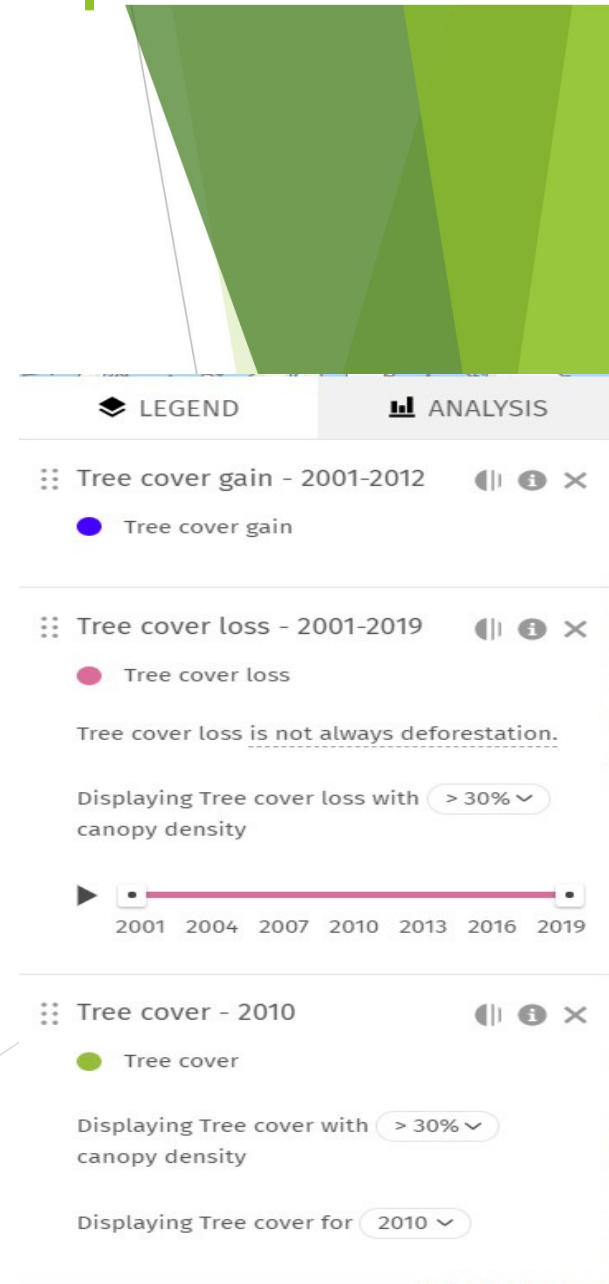

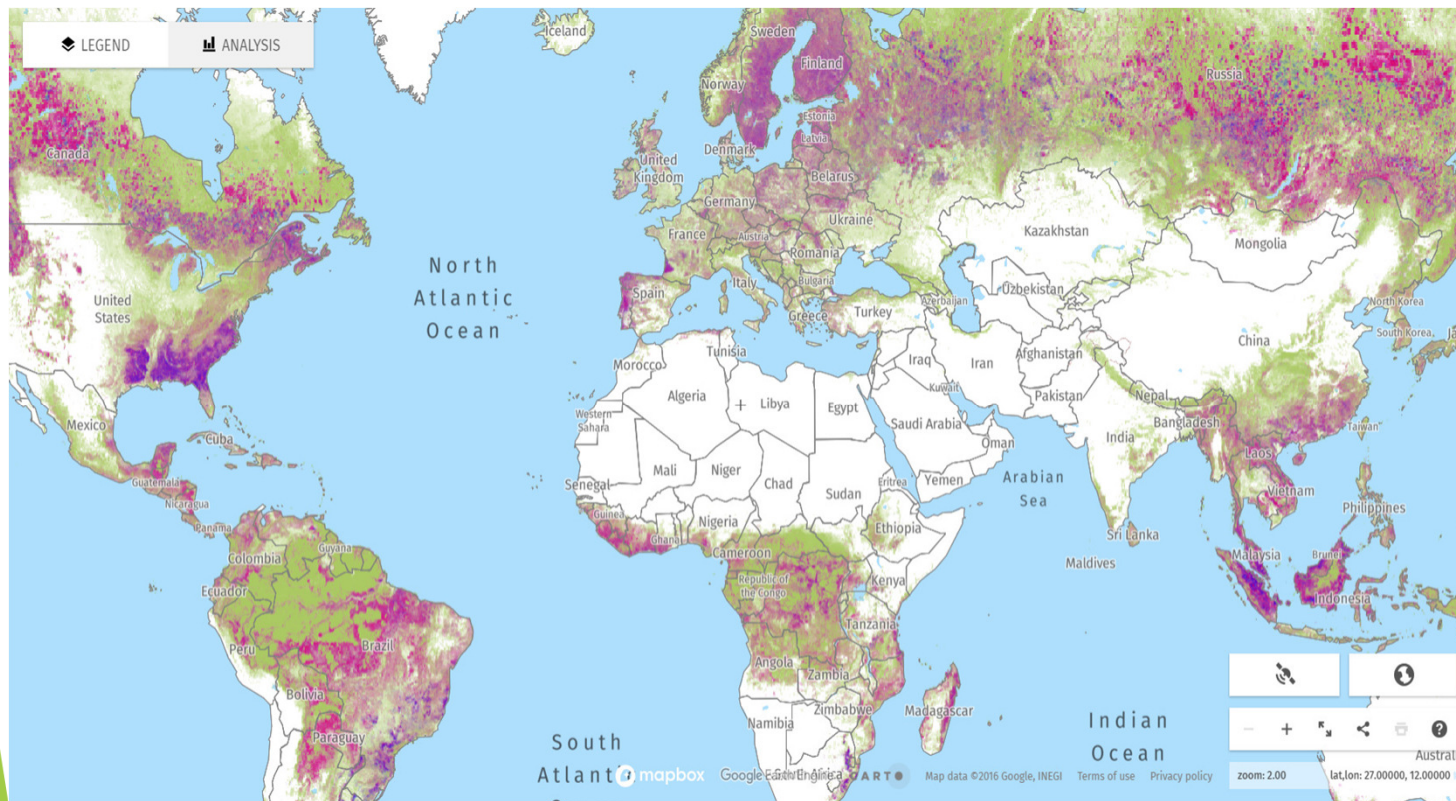

Essential Role of Photosynthesis in Defining Net Zero Carbon Dioxide Emissions for Equilibrium

- ❖ Northern Hemisphere forests consume only 2.6 gtyr^{-1} (2.6 billion tons per year) of carbon dioxide.
- ❖ All tropical forests in the Southern Hemisphere have switched to become oxygen consumers and carbon dioxide producers.
- ❖ We have a five-times increase in emissions of CO_2 mainly due to fossil fuel burning.
- ❖ We have a 97% decrease in photosynthesis consumption of carbon dioxide.
- ❖ The diffusion of CO_2 in the troposphere is toward the exosphere!

Photosynthesis issues

- ❖ The World Economic Forum has rightly said that we need to plant 1 trillion trees, which will—in just ten years--drain the atmosphere quickly by increasing the consumption of CO_2 (by 30 gt to 100 gtyr⁻¹).
- ❖ 35 billion tons of human emissions, 3 billion are deforestation issues. The switch over of the amazon to an oxygen sink and carbon dioxide producer is 15 billion tons of unaccounted for CO_2 annually.

$$r_{xy} = 0.99$$

- ❖ CO₂ Emissions correlation 363, Rain-forest photosynthesis lost 55 ppm.

Amazon Rain-forest

- ❖ 2 Billion acres deforested since 1950.
- ❖ **1950 start deforestation**
 - ❖ **1957 Atmospheric Carbon Dioxide started current increase 1970's trees and plants toppling over.**
- ❖ **Burning of bio-mass each acre causes minimum 1 billion CO₂ release annually (6 months). The massive release caused plants to grow to fast causing toppling and massive decay.**

Amazon Rain-forest

1990's Changeover to oxygen sink and carbon dioxide producer.

- ❖ Massive decay causing the rain-forest to change to an oxygen sink and carbon dioxide producer.
- ❖ One billion annual tons of carbon dioxide from biomass burning.
- ❖ 60 billion tons annual CO₂ consumption lost from deforestation.
- ❖ 300-400 billion tons annual CO₂ consumption loss from the switch over.
- ❖ 10-15 billion tons emissions from decay per annum
- ❖ **We have lost 20%+ of Earths Oxygen production.**

Loss of oxygen production worldwide

- ❖ The Amazon Rainforest deforestation is a 0.98 cause and effect to the reduction of oxygen since 1957.
- ❖ The oxygen loss cycles just like the CO₂ rise.

Correct solution for Atmospheric CO₂

- ❖ Moratorium on Rain-forest deforestation starting now! All nations need to put pressure on Brazil and all south America to stop this. Not one more acre.
- ❖ Plant native trees and shrubs all over the world. 3.5 billion new in 2019-2020. Increase Photosynthesis.
- ❖ Stop deforestation in India and everywhere which is not sustainable.

Planting Ideas

- ❖ Provide space where public can come and plant trees and shrubs. All government-owned lands. Very small cost. Need website with document for each planting area.
- ❖ Plant shrubs in all freeway medians and sides. This is revenue plus. Plant
 - ❖ native shrubs at a minimal spacing so all light is used in photosynthesis. This will take in 1 ton of CO₂ emissions per acre per year right at the source. The space would not need to be mowed every week in the summer.
- ❖ Get schools involved and planting massive number of trees and shrubs. In
 - ❖ their property and the government property as in 1 above.
- ❖ Parks can add trees and shrubs.
- ❖ Tax incentive for business to plant trees and shrubs. Flat roofs which can structurally handle dirt can plant shrubs at minimum spacing and water using drip irrigation.
- ❖ Wild fire attention. Get a retainer for the Jet plane and use it from the start
 - ❖ on any wild fire.
- ❖ This all government policy document is on the home page of cctruth.org

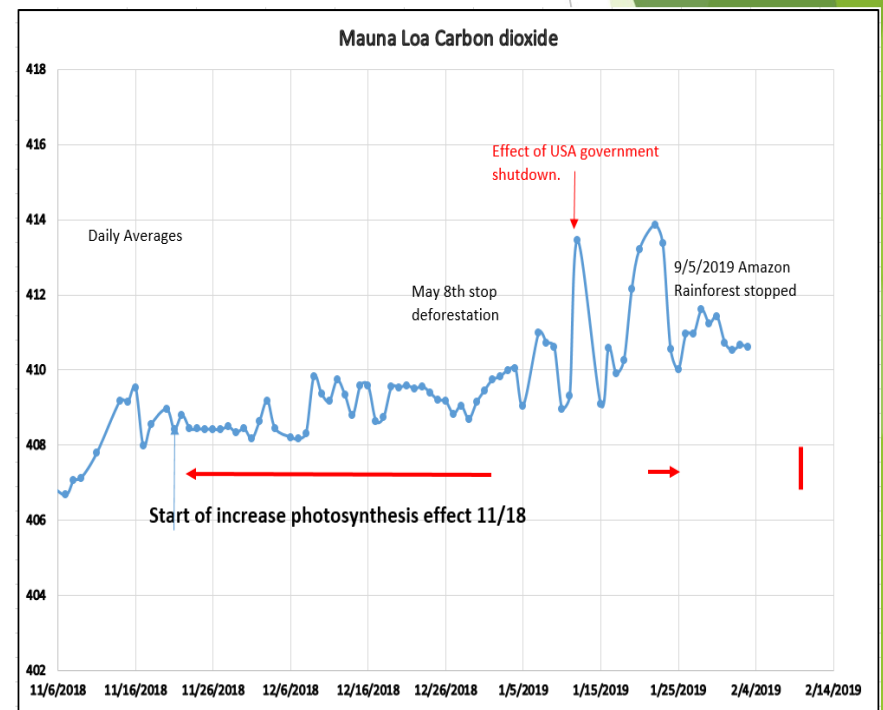

New Paradigm

- ❖ We have worked on Carbon Dioxide Emissions.
- ❖ Lets work on Photosynthesis. Atmospheric CO₂ decrease by 2031.
- ❖ Drain atmospheric CO₂ like a bathtub.

Results

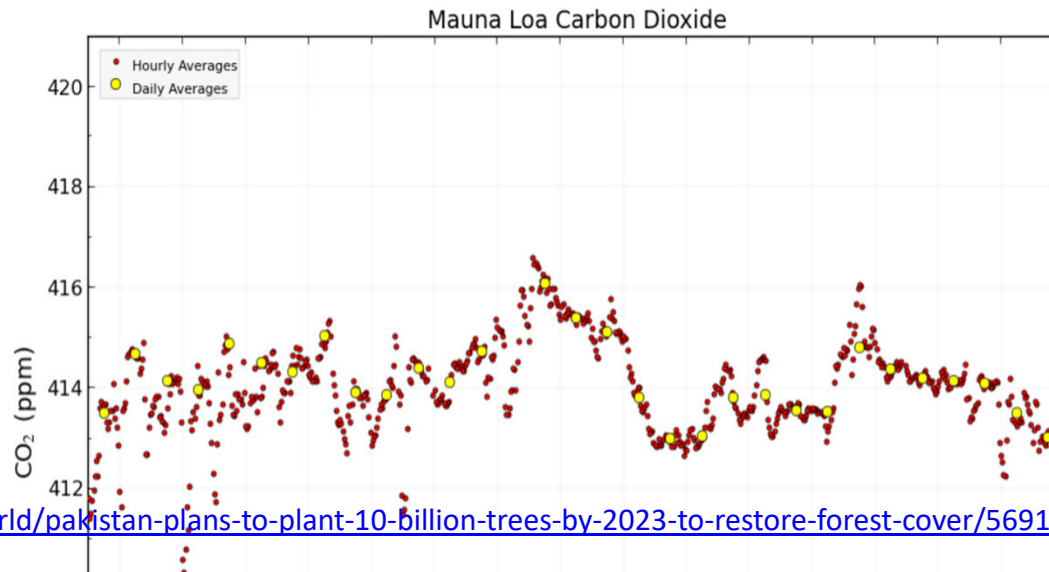

- With more than 1 billion trees planted and Indian Rain forest stopped deforestation.
- Atmospheric CO₂ went “flat” for the first time!
- Period of 1 month December 2019
- This year more than 4 billion trees and one rainforests stopped. Expect similar or longer flat period. Also this year minimum was Lower than normal (407.75-408.25)

Mauna Loa 2020

Recent Daily Average Mauna Loa CO₂

Tweet to Amazon leaders

- ❖ @jairbolsonaro @MartinVizcarraC @alvorada_palace, @MichelTemer @Peru @IvanDuque @evoespueblo @MashiRafael @MOTPGuyana @govsuriname @maduro_en @Lenin
- ❖ Stop Deforestation NOW! Peru announced they will stop later this year! <https://riotimesonline.com/brazil-news/rio-politics/stop-amazon-rainforest-deforestation-sponsored/>
- ❖ <https://cctruth.org/rainforest-stop.pdf>
- ❖ Intergovernmental Panel on Climate Change reports are science fiction.
 - ❖ On Facebook connect to Climate Change Truth and watch and share the video.

CO₂ does not freeze in Mesosphere

❖ Pressure in Mesosphere is 1mb (1 millibar)

Intergovernmental Panel on Climate Change

- ❖ IPCC Reports are Science Fiction. [Cctruth.org/ipcc.pdf](https://cctruth.org/ipcc.pdf)
- ❖ Review of:
 - ❖ SR 1.5 Chapter two “Mitigation” garbage
 - ❖ Atmospheric CO2 equilibrium statement had zero references to any published manuscript.
 - ❖ The actual equilibrium is 8.6 gt/yr.
 - ❖ Their only probability for their solution to work by lowering emissions of CO2 is 50-66%. Would you take your car to a mechanic who said they could fix it 50-66% of the time?
- ❖ <http://www.theenergynet.com/2020/06/one-mans-fight-to-end-deforestation-one-tree-at-a-time/>

Intergovernmental Panel on Climate Change

- ❖ Working Group I Second Order Draft for Ar6
 - ❖ The scientific consensus is 33% not 97%
 - ❖ IPCC GWP (Global warming potential) is false because it assumes equal concentrations of GHG. CO₂ is 412 ppm CH₄ is 1.8 ppm and so on.
 - ❖ Sea level rise is 1.1 mm/yr and not accelerating. The Jakobshavn Glacier in Greenland has grown for the third year in a row.
 - ❖ Residence time. In a 2003 report, the IPCC said it was from 5-200 years. Average residence time is 150 years.

Intergovernmental Panel on Climate Change

❖ Working Group III First Order Draft for Ar6

- ❖ Netflix watch “Kiss the ground” movie explains even if we stopped all CO₂ emissions atmospheric CO₂ will not lower.
- ❖ Use of Unscientific Terms. The document uses the unscientific terms highly (or otherwise) likely six times, unlikely three times, and highly (or otherwise) confident sixty-two times.
- ❖ The graph they use to say cause and effect for emissions vs. CO₂ rise has not been updated since 2012. After 2014 worldwide emissions were mostly flat, with a 3% drop last year.

Global Warming Potential

- ❖ IPCC Global warming potential is a false model!
 - ❖ Assumes equal GHG concentrations. Not based in reality!
- ❖ Dr. T. J. Blasing of Oak Ridge National Laboratory exposed greenhouse gasses to long wave radiation.

Gas (Watts/m ²)	Increased radiative forcing
CO ₂ ppm.	1.94
❖ CH ₄ Methane ppb.	0.50
❖ N ₂ O Nitrous Oxide	0.20
ppb O ₃ (Ozone)	0.40
❖ The remainder are negligible.	

Sea-Level Rise

❖ Tide Gauges & Satellites

- ❖ Different Linear Measures Inconsistent Results
- ❖ Apparently Unaffected by Recent CO₂ Increases

The Future for NYC?

II-Ocean Sea level rise is linear and not accelerating!

- ❖ No reliability in NOAA Sea level measurement's
- ❖ The NOAA satellite; Jason-3 has a minimum resolution of 25 mm.
 - ❖ This is like using a yardstick with no gradations and putting an unfamiliar object 20 feet away and then performing measurement's. The data would not be reliable.
- ❖ The Jakobshavn Glacier in Greenland has grown for the third year in row.

<https://earthobservatory.nasa.gov/images/145185/major-greenland>

World Sea-Level rise

❖ 3 Sources - Different Metrics

Tide Gauges 1.4mm/yr. Linear

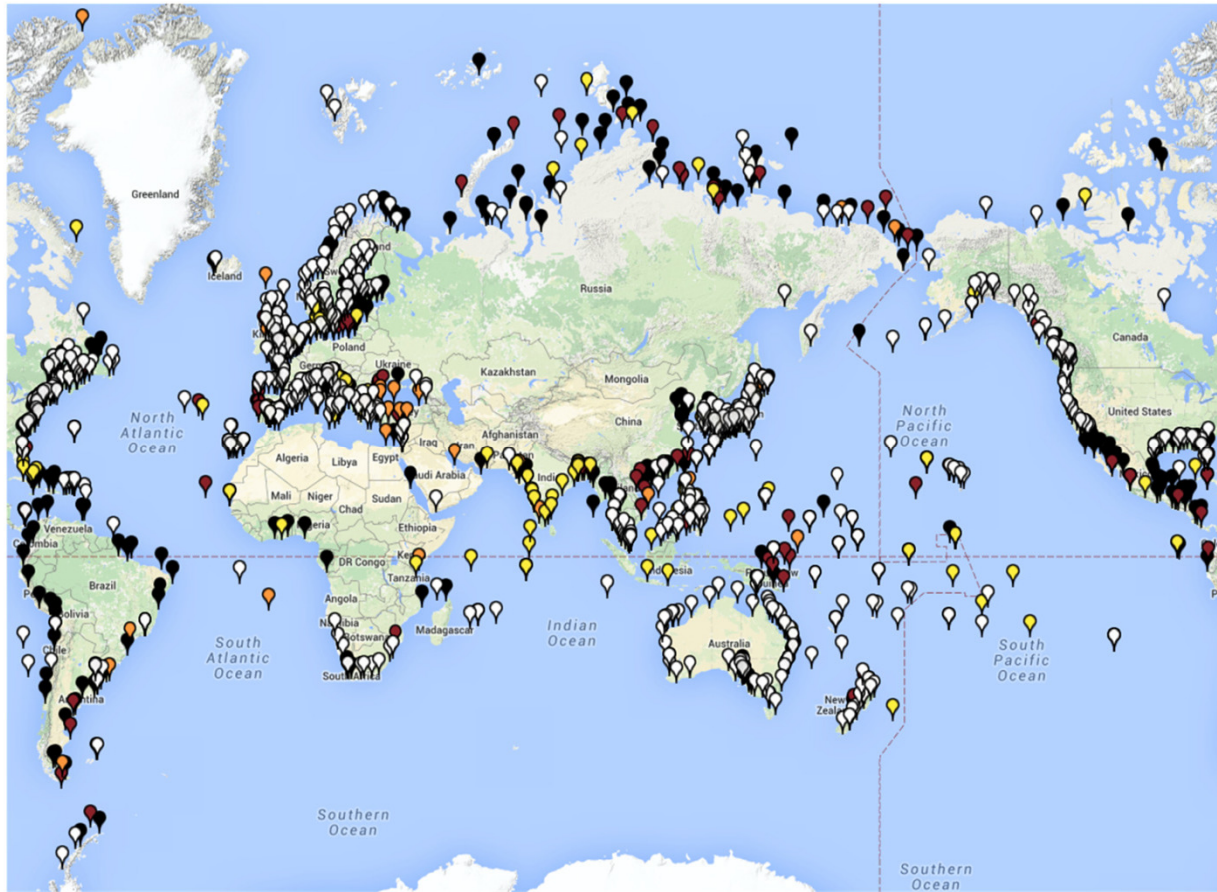

Topex/Poseidon/ Jason 1 - 3 3.3mm/yr. Linear

ENVISAT 0.5 - 2.5mm/yr. Linear

Tide Gauge Distribution

Satellite Systems

Satellite [Adjusted]

Topex/Poseidon Specifications

❖ Altitude 1335KM [830 Mi]
Radar Resolution

Ku-Band	13.65 GHz	23 mm wavelength
C-Band	5.3 GHz	56 mm wavelength
Orbital Tracking Error		20 - 40 mm

Massive 38% CO₂ Increase Since 1880

- Any sign of Sea-Level Rise Acceleration?
- They're all Linear

NOAA's 2016 list of 375 long term trend tide stations

Summary

- ❖ Atmospheric CO₂
 - ❖ Not caused by carbon dioxide emissions. Little effect.
 - ❖ Caused by massive loss of photosynthesis. Mainly Amazon Rain-forest Trees release Terpenes which induce rain!
 - ❖ Does not freeze in upper atmosphere.
 - ❖ Sea Level rise is not accelerating.
 - ❖ Contact Data
 - ❖ research@cctruth.org 971-409-7199
