

This email is bcc'd to thousands of scientists at the IPCC and EPA and NOAA. If the media doesn't write a story about this than these scientists will know the media is corrupt also.

Carbon dioxide is not pollution! Everyone breaths it out! This very much strengthens our legal argument for the lawsuits on cctruth.org lawsuit page to stop cap and trade! Exhibits 1 and 2 are our 23 PhD reviews of the Intergovernmental Panel on Climate Change (IPCC) reports which are deliberate science fiction.

What the Supreme Court did to the corrupt Environment Protection Agency (EPA):

The Clean Air Act of 1967 directed the EPA to tackle such issues as Acid Rain and others. It instructs the EPA to make a "toxic chemicals" list. Then any chemical the EPA wants to regulate in Section 111 subsection d must be on the toxic chemicals list. The EPA in 2015 illegally used section 111 subsection d to go after greenhouse gases without putting them on the toxic chemicals list. Carbon dioxide, methane etc. are not toxic and therefore could not be put on the list. Congress must start a congressional investigation and put the people who did this on trial. If congress wants the EPA to regulate Greenhouse gases, then it needs to write another law. However, they need to keep the following scientific facts in mind when writing such legislation.

Greenhouse Gas	Emission band cm ⁻¹	Radiation Flux W/m ²
H ₂ O Water vapor	All bands	303.8
CO ₂ Carbon dioxide	All bands	30.9-37.3
CH ₄ Methane	1200-1400	1.0-1.2
N ₂ O Nitrous Oxide	1200-1300	1.1-1.3
O ₃ Ozone	900-1100	3.0-3.3

Table 7.2 page 3 of http://irina.eas.gatech.edu/EAS8803_SPRING2012/Lec7.pdf

Calculating percent effect is for water vapor $303.8/344.2 * 100 = 88.26\%$

The 339.8 is the sum of these effects.

Water vapor is 89.4% ghg effect.

Carbon dioxide is 9.09%

Ozone is 0.88%

Nitrous Oxide is 0.32%

Methane is 0.29%

In our 23 PhD review of IPCC working Group 1 first order draft for Ar6 we found their faulty global warming potential model. This model assumes equal greenhouse gas (GHG) concentrations. This equal concentration will never happen in reality. Carbon dioxide is more than 200 times the concentration of methane. Furthermore, we found in Annex 2, a table with the correct order of GHG effects. Any model which ignores data to benchmark it with is a fake model. We sent our review at least 23 times to them. However, for the final draft for Ar6 they deleted the table from Annex 2! This is how corrupt they are.
