Like earthquakes, Wave phenomena decreases by X^{-4} by distance. The earthquake which is over 100 miles direct west of Garibaldi will only be around 6 in strength for the Willamette valley 160 miles away. This can be confirmed by previous earthquakes and the damage area is not more than 50-60 miles depending on the earthquake strength. Climate change is fear-mongering nonsense of the UN.

Junk Science Related to Fine Particles and Health.

Cctruth.org

<https://pmc.ncbi.nlm.nih.gov/articles/PMC6034084/>

Executive Summary

Using studies of particle matter affecting allergic respiratory diseases done in **China** is Junk science. The air in **China** cities is 50 times more polluted than the worst place in

the USA. China and India must install exhaust scrubber on their industrial plants to clean the air.

More often than not in today's woke environment, we're confronted with pseudo-science flack unsupported by scientific fact. For example:

"Health impact of airborne particulate matter (PM) has long been a concern to clinicians, biologists, and the general public. With many epidemiological studies confirming the association of PM with allergic respiratory diseases, an increasing number of follow-up empirical studies are being conducted to investigate the mechanisms underlying the toxic effects of PM on asthma and allergic rhinitis. "

Comment: With words like "association of PM with allergic respiratory diseases," this is not science. Where are the statistics?

"Correlation between air pollution and children's asthma-related emergency hospital visits." "Correlation between PM10/PM2.5 and outpatient visits for respiratory disease Jinan, **China**."

Question: Where is the correlation coefficient? China's air is 50X worse than air in the USA. More worthless studies in China for USA.

Table 1.

Representative epidemiological studies of the association between particulate matter concentrations and hospital visits due to respiratory diseases.

Correlation between PM10/PM2.5 and outpatient visits for respiratory disease
Jinan, **China** 2013–2015 PM2.5 Generalized additive model All ages
Respiratory diseases Ambient PM10 and PM2.5 pollution was positively
associated with daily hospital visits due to respiratory disease IR: 0.36% (0.30%–
0.43%)

There exists no correlation coefficient greater than 1. RR or r-squared must be 1 or less.

PM10 IR: 0.50% (0.30%–0.70%)

Effects of fine PM on emergency room visits for asthma Southern Taiwan, **China**
2008–2010 PM2.5 Quasi-Poisson generalized additive model.

Children Hospital ERVs for asthma Children were susceptible to the effects of PM2.5
RR: 1.016 (1.002–1.030)

There exists no correlation coefficient greater than 1. RR or r-squared must be 1 or less. Taiwan air is much worse than USA air.

Effects of exposure to indoor PM on symptoms and acute exacerbations in COPD patients Southwestern Taiwan, **China** 2014–2016 PM10 Generalized estimating equation analysis All ages Admission due to acute exacerbation of COPD PM was associated with worse respiratory symptoms and increased risk of COPD exacerbation in patients with moderate to very severe COPD OR: 16.2 (3.10–84.9)

There exists no correlation coefficient greater than 1. RR or r-squared must be 1 or less. Taiwan air is much worse than USA air.

Correlation between fine particulate air pollution and hospital visits for asthma Beijing, **China** 2010–2012 PM2.5 Generalized additive Poisson model All ages Asthma HVs Short-term elevations may increase the risk of asthma exacerbation IR: 0.67% (0.53%–0.81%)

Asthma OVs IR: 0.65% (0.51%–0.80%)

Asthma ERVs IR: 0.49% (0.35%–0.64%)

There exists no correlation coefficient greater than 1. RR or r-squared must be 1 or less. China air is much worse than USA air

All courts must be article III of the US Constitution.

Chevron doctrine is illegal Agencies like FERC and EPA cant cherry pick data for their false agenda.

Stare decisis must be vertical to the Constitution, not horizontal. This is because any other case can't be guaranteed to have enough similarities to warrant use unless the Judge and counsel on both sides have read case transcripts, exhibits and final ruling.

Our Story salmonprotectiondevice.com

I knew Steve Cramer since the early 1990's. Steve was working on salmon research as Cramer Fish Sciences. Through the years Steve and I had talked about the idea of Salmon Protection Devices (SPD) to prevent the sea lions from attacking the salmon as they enter the fish ladders at Bonneville Dam. Unfortunately, Steve passed away of cancer in the Spring of 2023. In January, that year I talked with Steve and he said he wasn't going to live much longer and he asked me to make the SPD a reality. I told him I'd do everything I could, but my resources were limited.

Then in December 2023 I saw ODFW funding available for such projects and with Steve in mind went ahead and applied. The application process asked how this idea will be promoted. I post it on twitter every day and have 3000 followers who repost it. Also on the next-door app. In the process I contacted the Army Corp of Engineers. They liked the idea and rushed the Section 408 and Joint application. This application normally takes a year, but they finished in one month. We also received the fish ladder drawings from the Corp.

I Salmon fished on Sauvie Island many times between January and March each year. Our group of about 25 would walk back a few miles to our favorite spot. Salmon are much faster than Sea Lions and can normally out run them, but not on the end of a fish line. Almost every other catch a sea lion would take the Salmon off our line and eat it. We ended up with a salmon head and that's all.

As part of the follow-up protocol, we're asking for a three-year moratorium on Salmon Fishing below the Bonneville Dam on both banks. This, along with the SPD will remove easy access to food for the Sea Lions in the river. This should be adequate time to train the Sea Lions to return to the ocean where they belong and give the Salmon population time to recover, free from sea lions and fishermen.

As noted in the table below, the increase in Sea Lions correlates almost one-to-one with the declining fish counts at Bonneville dam. It's a well-known fact that the Sea Lions wait at the fish ladders on the downstream side of the Dam for Salmon going upstream to enter the ladder. One Sea Lion eats its fill and another Sea Lion takes its place in a round robin style.

See Figures one and two for virtual proof that the major issue with the decline in salmon population on the Columbia is the Sea Lions, not the dams. The two lines are almost parallel, indicating correlation of the two variables.

<https://www.columbian.com/news/2015/oct/21/sea-lions-now-a-year-round-issue-in-columbia/>

The problem is a bit different on the Green Peter Dam in Western Oregon, where water turbidity has been killing the fish. A judge ordered draining the reservoir on the assumption that that would allow it to refill with clean water from upstream. However, that made turbidity much worse as dirt sloughed off the newly exposed banks and the water level went down. This was done on the advice of a radical environmental group that stands to profit from removal of the dam after the fish are “protected.” Their idea of “protection” has killed orders-of-magnitude more fish than would get the rest of us thrown in jail probably for life.

They made no effort to consult with Dam operators or local residents before making their extreme draw-down, and dam removal proposal. When I visited the dam with my sister to take some pictures, I spoke with the Dam operator. He said that he emphatically did not agree with the judge’s ruling and that the protocol had resulted in far more fish being killed by additional turbidity. He recommended dredging behind the dam to save both the dam and the fish. This will get the fish ladder working again. That fish ladder has not been operational since the late 1980’s because of silt buildup behind the dam.

On the way home, I spoke with a member of the university team who had prepared the scientific assessment for the court. After a brief discussion with myself and my sister he agreed that dredging behind the dam would be the best solution.

[This article was edited by Oliver Woods, Head-of-School at www.hymarkacademy.us, an online classical school for grades 7-12. Keys to the Classics: A History of the Decline and Fall of Western Civilization]

Figure 1. Sea Lion Increase in Columbia River

Figure two salmon counts decrease almost mirrors the Sea Lion Increase, making it a direct correlation. Call Senator Thune and tell him to pass the save America act. Pass the save America act and quit lying. In Oregon an undocumented alien can get a driver's license to vote. This is illegal by federal law and lets hundreds of thousands who are undocumented aliens vote. In Oregon recently a Federal Judge ruled 800,000 dead people still voting democrat were removed from the voter roles. Anyone legally here can get a duplicate birth certificate by mail in a few weeks. 90% of Americans want vote by mail stopped Pass the save America act.

John Thune

National Education Association (NEA)

- The NEA has twisted and fractured our student's ability to learn under any recognizable educational system.
- The NEA is the cause of the declining test scores. They are teaching to the lowest educated student in a class. Leave no student behind leaves the brightest students behind.
- The NEA removed hunter's safety courses from schools. No child is taught the proper use of a gun.
- The NEA removed discipline from the schools. No teacher or principal can discipline any student for any reason.

National Education Association (NEA)

- The NEA has twisted and fractured our student's ability to learn under any recognizable educational system.
- The NEA is the cause of the declining test scores. They are teaching to the lowest educated student in a class. Leave no student behind leaves the brightest students behind.
- The NEA removed hunter's safety courses from schools. No child is taught the proper use of a gun.
- The NEA removed discipline from the schools. No teacher or principal can discipline any student for any reason.
- The NEA is the cause of school shootings. With no discipline, ever declining morals, low test scores and abortion the NEA is out of control and they push back parents that want to make a change. On top of this, violent video games introduce children to a world that captivates them where life is seen as cheap and disposable. The school boards do nothing to change it and protect the NEA's stance on making things worse.
- The NEA changed the scientific method to a "consensus". They have eliminated the student's ability to learn from any recognizable scientific education standard. The scientific method is: Hypothesis with confirming data goes to theory. With more factual confirmation the data goes to scientific law.
- What do you think will happen when most school students who graduate public schools find out the schools lied to them and they can't get a job! A certain small percentage are likely to exact the kind of revenge they have been programmed to in their video worlds.
- At Hymarkacademy we teach the correct scientific method, the students learn marketable skills and they remain safe while attending their classes. We also welcome the parents input in what the family is trying to achieve and making that a reality for them.

Title 3--
The President [[Page 67249]]

Executive Order 13175 of November 6, 2000

Consultation and Coordination With Indian Tribal Governments

By the authority vested in me as President by the Constitution and the laws of the United States of America, and in order to establish regular and meaningful consultation and collaboration with tribal officials in the development of Federal policies that have tribal implications, to strengthen the United States government-to-government relationships with Indian tribes, and to reduce the imposition of unfunded mandates upon Indian tribes; it is hereby ordered as follows:

Section 1. Definitions. For purposes of this order:

- (a) ``Policies that have tribal implications" refers to regulations, legislative comments or proposed legislation, and other policy statements or actions that have substantial direct effects on one or more Indian tribes, on the relationship between the Federal Government and Indian tribes, or on the distribution of power and responsibilities between the Federal Government and Indian tribes.
- (b) ``Indian tribe" means an Indian or Alaska Native tribe, band, nation, pueblo, village, or community that the Secretary of the Interior acknowledges to exist as an Indian tribe pursuant to the Federally Recognized Indian Tribe List Act of 1994, 25 U.S.C. 479a.
- (c) ``Agency" means any authority of the United States that is an ``agency" under 44 U.S.C. 3502(1)

Sec. 3. Policymaking Criteria. In addition to adhering to the fundamental principles set forth in section 2, agencies shall adhere, to the extent permitted by law, to the following criteria when formulating and implementing policies that have tribal implications: Agencies shall respect Indian tribal self-government and sovereignty, honor tribal treaty and other rights, and strive to meet the responsibilities that arise from the unique legal relationship between the Federal Government and Indian tribal governments.

With respect to Federal statutes and regulations administered by Indian tribal governments, the Federal Government shall grant Indian tribal governments the maximum administrative discretion possible.

(a) When undertaking to formulate and implement policies that have tribal implications, agencies shall:

encourage Indian tribes to develop their own policies to achieve program objective where possible, defer to Indian tribes to establish standards; and in determining whether to establish Federal standards, consult with tribal officials as to the need for Federal standards and any alternatives that would limit the scope of Federal standards or otherwise preserve the prerogatives and authority of Indian tribes.

Sec. 4. Special Requirements for Legislative Proposals. Agencies shall not submit to the Congress legislation that would be inconsistent with the policymaking criteria in Section 3.

Sec. 5. Consultation. (a) Each agency shall have an accountable process to ensure meaningful and timely input by tribal officials in the development of regulatory policies that have tribal implications. Within 30 days after the effective date of this order, the head of each agency shall designate an official with principal responsibility for the agency's implementation of this order. Within 60 days of the effective date of this order, the designated official shall submit to the Office of Management and Budget (OMB) a description of the agency's consultation process.

(b) To the extent practicable and permitted by law, no agency shall promulgate any regulation that has tribal implications, that imposes substantial direct compliance costs on Indian tribal governments, and that is not required by statute, unless:

(1) funds necessary to pay the direct costs incurred by the Indian tribal government or the tribe in complying with the regulation are provided by the Federal Government; or

(2) the agency, prior to the formal promulgation of the regulation,

(A) consulted with tribal officials early in the process of developing the proposed regulation;

(B) in a separately identified portion of the preamble to the regulation as it is to be issued in the Federal Register, provides to the Director of OMB a tribal summary impact statement, which consists of a description of the extent of the agency's prior consultation with tribal officials, a summary of the nature of their concerns and the agency's position supporting the need to issue the regulation, and a statement of the extent to which the concerns of tribal officials have been met; and

(C) makes available to the Director of OMB any written communications submitted

to the agency by tribal officials.

To the extent practicable and permitted by law, no agency shall promulgate any regulation that has tribal implications and that preempts tribal law unless the agency, prior to the formal promulgation of the regulation, consulted with tribal officials early in the process of developing the proposed regulation;

in a separately identified portion of the preamble to the regulation as it is to be issued in the Federal Register, provides to the Director of OMB a tribal summary impact statement, which consists of a description of the extent of the agency's prior consultation with tribal officials, a summary of the nature of their concerns and the agency's position supporting the

need to issue the regulation, and a statement of the extent to which the concerns of tribal officials have been met; and

makes available to the Director of OMB any written communications submitted to the agency by tribal officials.

On issues relating to tribal self-government, tribal trust resources, or Indian tribal treaty and other rights, each agency should explore and, where appropriate, use consensual mechanisms for developing regulations, including negotiated rulemaking.

Sec. 6. Increasing Flexibility for Indian Tribal Waivers.

- (A) Agencies shall review the processes under which Indian tribes apply for waivers of statutory and regulatory requirements and take appropriate steps to streamline those processes.
- (B) Each agency shall, to the extent practicable and permitted by law, consider any application by an Indian tribe for a waiver of statutory or regulatory requirements in connection with any program administered by the agency with a general view toward increasing opportunities for utilizing flexible policy approaches at the Indian tribal level in cases in which the proposed waiver is consistent with the applicable Federal policy objectives and is otherwise appropriate.
- (C) Each agency shall, to the extent practicable and permitted by law, render a decision upon a complete application for a waiver within 120 days of receipt of such application by the agency, or as otherwise provided by law or regulation. If the application for waiver is not granted, the agency shall provide the applicant with timely written notice of the decision and the reasons therefor.
- (D) This section applies only to statutory or regulatory requirements that are discretionary and subject to waiver by the agency.

Sec. 7. Accountability.

- (a) In transmitting any draft final regulation that has tribal implications to OMB pursuant

to Executive Order 12866 of September 30, 1993, each agency shall include a certification from the official designated to ensure compliance with this order stating that the requirements of this order have been met in a meaningful and timely manner.

- (b) In transmitting proposed legislation that has tribal implications to OMB, each agency shall include a certification from the official designated to ensure compliance with this order that all relevant requirements of this order have been met.
- (c) Within 180 days after the effective date of this order the Director of OMB and the Assistant to the President for Intergovernmental Affairs shall confer with tribal officials to ensure that this order is being properly and effectively implemented.

Sec. 8. Independent Agencies. Independent regulatory agencies are encouraged to comply with the provisions of this order.

Sec. 9. General Provisions. (a) This order shall supplement but not supersede the requirements contained in Executive Order 12866 (Regulatory Planning and Review), Executive Order 12988 (Civil Justice Reform), OMB Circular A-19, and the Executive Memorandum of April 29, 1994, on Government-to-Government Relations with Native American Tribal Governments.

- (b) This order shall complement the consultation and waiver provisions in sections 6 and 7 of Executive Order 13132 (Federalism).
- (c) Executive Order 13084 (Consultation and Coordination with Indian Tribal Governments) is revoked at the time this order takes effect.
- (d) This order shall be effective 60 days after the date of this order.
- (e) Sec. 10. Judicial Review. This order is intended only to improve the internal management of the executive branch, and is not intended to create any right, benefit, or trust responsibility, substantive or procedural, enforceable at law by a party against the United States, its agencies, or any person.

(Presidential Sig.) THE WHITE

HOUSE,

November 6, 2000.

Democrat shutdown. Using the pain inflicted by the shutdown as leverage. If you want cheap healthcare move to Mexico. American doctor for \$50 or less RX less than \$20. The issue with healthcare is not enough doctors and Nurses. Root cause analysis says this is because not enough Doctors to teach Doctors or Nurses to teach Nurses. Doctors who teach only get paid around \$180,000 per year vs. \$400,000 private practice. Nurses who teach get paid around \$80,000 a year. Graduates get paid

\$100,000 to \$120,000. Therefore, the solution is to change pay for Doctors who teach to \$350,000 a year and Nurses who teach to \$120,000 a year. This will only cost \$50 million a year. Then in 6 to 8 years, we will have a doctor everywhere for \$50 a visit. President Trump is lowering RX prices. Trumprx.gov

Measure carbon dioxide foot print.

Background: the carbon footprint calculators online are bogus. They only calculate emissions of carbon dioxide. They do not allow for photosynthesis consumption. Also per capita is a lie of the IPCC and UN. Pollution is measured by weight. When anyone goes to the dump they don't charge by number of people they charge by weight in minus weight out. At cctruth.org we have two National Institute of Standards and Technology (NIST) certified carbon dioxide sensors. The data from which is guaranteed by the US government. The NOAA carbon data is fake. They use a flask method and don't control temperature or pressure.

Any business which has shrubs and trees around it is most likely to be negative carbon and doesn't need to do anything to lower their footprint any further. Very soon the government will have every business go online and get a report of their business carbon footprint. For example, for one business the online version said they had to put solar panels and the owners had to buy electric cars. We measured their actual carbon footprint and they were negative 35 ppm. They don't need to do anything. The atmospheric winds keep carbon dioxide and all greenhouse gases similar concentration through the latitudes. Even if a

business doesn't have trees, any close trees will be consuming the carbon dioxide.

❖ CO₂ mixed by atmospheric winds.

❖ Courtesy Pieter Tans Mauna Loa

❖ Dave White cctruth.org

The residence time of Atmospheric Carbon dioxide. Residence time is like standing water in a kitchen sink with the drain plugged. The water is residing longer. Retention time is the same idea as residence time. The average residence time is the average time a molecule of carbon dioxide, for example, to stay in the troposphere.

More than 160 PhD's in 19 published manuscripts summarize in one published manuscript. Anything we have done or will do with emissions of carbon dioxide will take 150 years to have any effect. Proof is any major events which would have lowered atmospheric carbon dioxide worldwide for which there is still no effect in the data.

Oil embargo in the 1970's, for almost two years the worldwide carbon dioxide emissions would have dropped by 90%

Multiple recessions each one the worldwide carbon dioxide emissions would have decreased by 40% for at least one year.

Worldwide recession in 2009. A 70% reduction in emissions of carbon dioxide for almost two years.

COVID-19 pandemic. A 6% reduction in emissions for 1.5 years.

You can clearly see no signature from these events in the NOAA data.

Residence Time (Years) Author Year. Residence time is like standing water in your kitchen sink. The water is residing longer.
